

Severe Weather

www.CrosswordWeaver.com

ACROSS

- 3 fair weather with this due to sinking motion of the air so clouds do not form
- 4 change in atmospheric state due to the time of year
- 9 used to measure air pressure
- 12 changing of wind speed or direction as altitude increases
- 14 severe weather has been sighted
- 16 arrives second because light travels faster than sound
- 17 storm with winds 74 mph or lower
- 19 water droplets that fall at a temp below freezing
- 20 center of the hurricanes
- 21 the present state of the atmosphere
- 24 type of front where a warm air mass runs into cold air mass with little

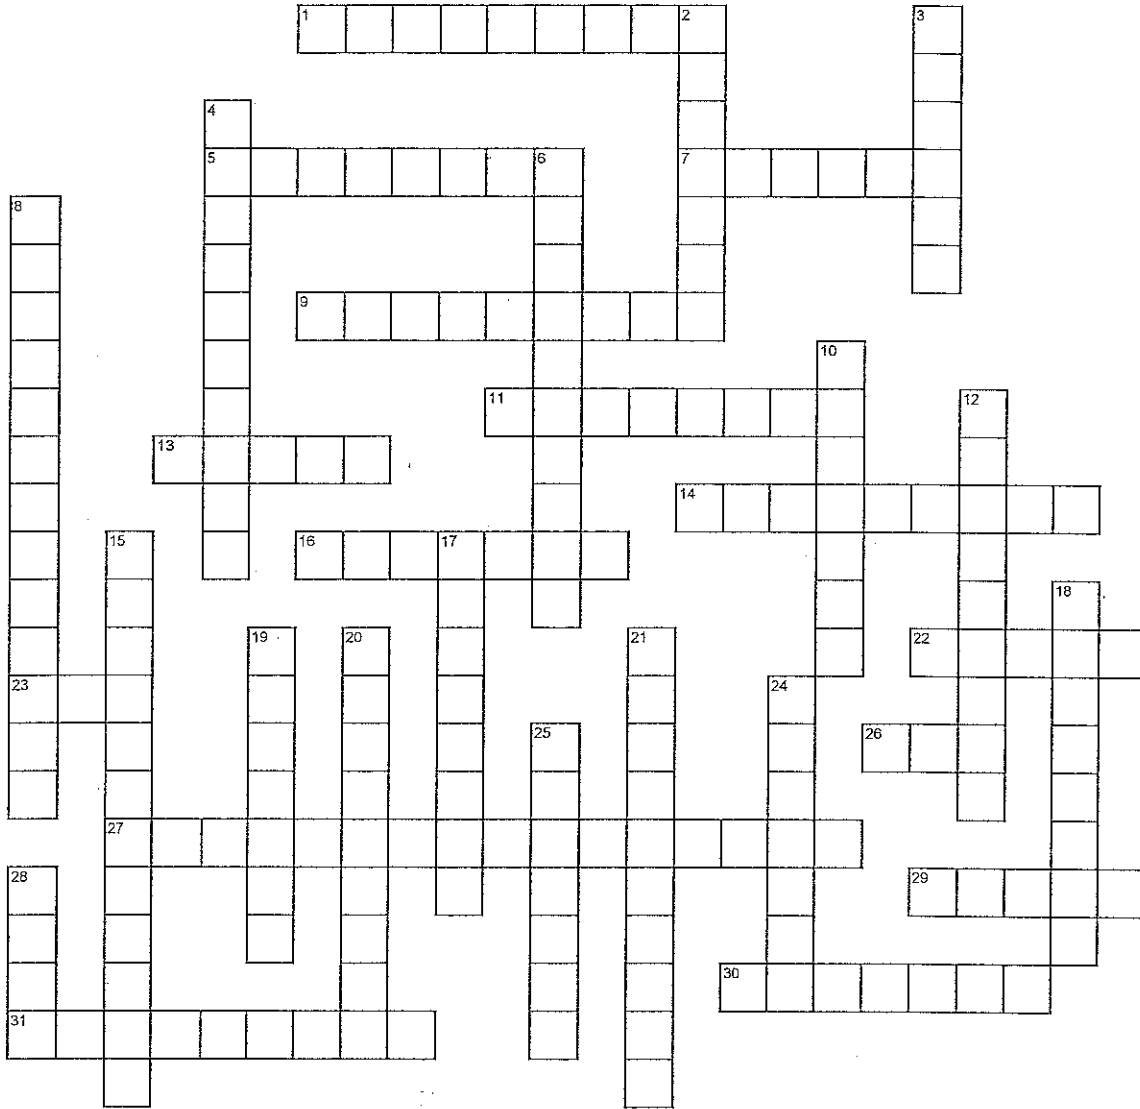

- movement occurring
- 25 where the earth gets all its energy
- 26 storm with winds 75mph or higher
- 27 hurricane season from June to
- 28 add to the name of any cloud and it means precipitation
- 29 when snow passes through warm air, melts and refreezes near the ground

DOWN

- 1 hurricane gets energy from
- 2 high speed rotating winds that extend downward from clouds
- 4 type of cloud that forms near the ground and effects visibility
- 5 a fast moving cold air mass runs into a slow moving warm air mass
- 6 boundary between two air masses
- 7 most dangerous part of hurricane

- raises water level and it sweeps across coast
- 8 measures intensity of hurricane
- 10 series of water waves caused by an earthquake
- 11 the amount of water in air compared to how much it can hold
- 13 conditions are right for severe weather
- 15 the temperature at which air is saturated and condensation begins
- 16 three ingredients are moisture, warm and humid air
- 18 areas of positive and negative electrical charges built up in storm clouds
- 22 when air is holding all the moisture it can
- 23 extended period with lack of water supply
