Unit 6-Astronomy

Vocabulary

Science 9

Use your book or other means to define the following terms:

asteroid

big bang theory

black hole

clusters

constellation

eclipse

galaxy

interstellar matter

light-year

nebular model

neutron star

phases

planet

red giant

red shift

solar system

star

supergiant

supernova

universe

white dwarf

Expanding Universe  
p. 581

Light Spectrum  
p. 334

Milky Way Galaxy  
p. 578

Nebular cloud

Fusion

Nuclear reactions

Star temperature  
p.587

Star composition  
OS

Star destruction  
OS

Star formation  
OS

Star size  
OS
